

I'm a 20-year-old racing driver from Derbyshire, and my passion for racing started when I got into a kart for the first time, aged 9. Since then, I haven't looked back and I transferred my race wins in karts into cars, making a smooth transition to junior car racing, aged 16.

I'm a multiple podium winner, winning races in the Mazda MX5, MK3 at many of our British iconic circuits. My favourite circuit is my local one, which is Donington Park. I've been driving around Donington since gaining my ARDS aged 16, winning many trophies there.

I'm happy to offer tuition at all race circuits, and my tuition style is calm, focused, with my aim to achieve enjoyment, alongside improvement.

I have the ability to instruct and communicate verbally in a clear but precise way. I was praised in my ARDS exam for giving positive, clear instructions, working well under pressure and my ability to maintain composure when presented with a stressful situation.

I enjoy life, being a positive and polite person and feel it's important that those I'm instructing leave with a positive experience and one where they feel they have made progress. I have received and continue to receive excellent tuition from the Hills' motorsport team which I race with and enjoy giving back what I have learnt myself.

2026 will see me competing in the BRSCC Mazda Supercup Championship with Hill's Motorsport.

I'm also building a racing MGB with my dad, with a view to race in the CSCC Swinging 60's championship.

Please get in touch for competitive hourly/daily rates and I'm happy to travel.
