

I have been Racing myself since I was 8 years old, progressing from Karts to Cars at 14 as a junior driver.

I have raced in UK and Europe from hatches to Prototypes to GT cars

In 2020 I was the development driver for the BRSCC to set up the new Turbo Fiesta

I have hundreds of podiums, multiple pole positions, wins and fastest laps as well a track records.

As an instructor I have experience in all types of cars, front and rear wheel drive from clios to Lamborghini.

I am adaptable to the client's needs, whether its confidence on the track, reducing bad habits or looking for the last tenths to win races.

I have successfully taken drivers with almost no car racing experience to stepping onto the podium.

I also own front and rear wheel drive race cars that can be used for instructing and racing

Feel free to call me to discuss your needs.
